DETAILED ACTION

Allowable Subject Matter

1. **Claims 1-17, 20, 22, 24 and 25** are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:

Regarding **claims 1, 9, 14, 17, 22 and 24**, the main reason for indication of allowable subject matter is because the prior art fails to teach or reasonably suggest that the contact sheet generation mechanism, in response to determining that a current contact sheet file includes a maximum number of thumbnail images after adding an additional thumbnail image to the current contact sheet files is to create a new contact sheet file and set the new contact sheet file as the current contact sheet file to which further thumbnail images are to be added.

Ogawa, US Patent 6,603,506 discloses a digital camera (Figs. 1: 10 and 13: 10) comprising: a picture-taking mechanism (Fig. 1: 10a) to take pictures to generate image files (Col. 3, lines 40-53) corresponding to the pictures; and, a contact sheet generation mechanism (Fig. 1: 10m) to generate one or more contact sheet files, each contact sheet file including a plurality of thumbnail images, each thumbnail image corresponding to one of the image files (Fig. 5, col. 3, lines 8-33; col. 4, line 54 – col. 5, line 29; col. 5, lines 58-63). However Ogawa fails to teach or reasonably suggest that the contact sheet generation mechanism, in response to determining that a current contact sheet file includes a maximum number of thumbnail images after adding an additional thumbnail image to the current contact sheet files is to create a new contact sheet file

and set the new contact sheet file as the current contact sheet file to which further thumbnail images are to be added.
